ABOUT ME

Versatile technologist with almost 4 years of experience across software engineering, data infrastructure, and IT operations. I specialize in designing full-stack solutions, engineering data pipelines, and maintaining highly available cloud and on-premise networks. From resolving complex server bottlenecks to building resource management databases and deploying machine learning models, my focus is always on creating efficient, reliable systems that solve tangible business and community challenges.

WORK EXPERIENCE

SOFTWARE DEVELOPER – ARTLINK AGENCY LIMITED – 05/02/2025 – Current – KENYA

- **Acted as a liaison between the technical engineering team and non-technical stakeholders**, successfully translating complex business needs into precise, actionable data architecture specifications.
- **Engineered automated workflow solutions using Zoho**, reducing manual administrative backlog and significantly accelerating operational response times.
- **Developed a custom RAG knowledge assistant** using OpenAI APIs, enabling staff to instantly query and synthesize insights from unstructured internal documentation.
- **Ensured 99.9% system availability** through proactive infrastructure monitoring and rapid incident resolution, maintaining high reliability for critical business data systems.

DATA ENGINEER – EXPLORE AI – 07/01/2023 – 22/12/2024 – SOUTH AFRICA

- **Collaborated with non-technical domain experts to define data requirements**, translating vague problem statements into strict technical specifications.
- **Engineered a scalable geospatial data pipeline on AWS** using Python to process Landsat and Sentinel imagery, directly supporting high-resolution GDP prediction models for economic analysis.
- **Architected a cost-efficient hybrid cloud/on-prem infrastructure**, optimizing system accessibility for remote field teams while reducing cloud operational costs by 10% through strategic resource allocation.
- **Designed and deployed a student performance monitoring system** for 500+ beneficiaries, automating the identification of at-risk students to facilitate data-driven early intervention strategies.
- **Established a high-rigor data warehousing ecosystem on GCP** to support BI and ML workflows, utilizing **dbt** for transformations and **Deequ** for automated data quality assertions and governance.

EDUCATION AND TRAINING

12/05/2025 – CURRENT Nairobi, Kenya
MSC COMPUTING AND INFORMATION SYSTEMS Strathmore University

Field of study Information and Communication Technologies

03/09/2018 – 12/07/2024 Nairobi, Kenya
BSC ELECTRICAL AND ELECTRONIC ENGINEERING Kenyatta University

Final grade Second Class Honors (Upper Division)

02/2014 – 11/2017 Kikuyu, Kenya
KENYA CERTIFICATE OF SECONDARY EDUCATION Alliance High School

Final grade A-

PROJECTS

Monies

Android application for parsing mobile money messages into financial transactions for display, grouping and analysis built with Kotlin leveraging Android's Room SQLite database.

Link <https://github.com/kimaita/monies-v2>

Scrib

A web application for converting YouTube channel content to audio files for podcasting and/or download. Built with ffmpeg, Python and Javascript and hosted on GCP and Cloudflare

Link <https://github.com/kimaita/scrib>

Harambee

A cross-platform desktop application built using Java to centralize and track philanthropic resource flows with a normalized PostgreSQL database schema to handle complex transaction data, ensuring strict ACID compliance and data integrity for reporting across diverse operating environments

Link <https://github.com/kimaita/harambee>

CERTIFICATIONS

ALX Africa, 29/11/2024

Back-end Engineer

Explore AI Academy, 24/11/2023

Data Engineering Certificate

AWS, 11/08/2023

AWS Certified Cloud Practitioner

SKILLS

Programming Languages

Python | SQL | JavaScript | Java | Bash

Software Engineering

API Development | Spring Boot | React | Svelte | Node.js | Flask | FastAPI | OOP | Microservices | System Design

Data Engineering

Data Warehousing | Data Modelling | ELT/ETL Pipelines | Airflow | Apache Spark | Apache Kafka | dbt | DuckDB | PowerBi | PostgreSQL | MySQL | OLAP Databases

IT, Cloud & DevOps

Google Cloud | AWS | Cloudflare | Linux | CI/CD Pipelines | IaC | Networking | Server Management | Git | Docker

VOLUNTEERING

03/04/2023 – 30/11/2023 Nairobi, Kenya

STEM Education Mentor & Capacity Builder

- Designed and delivered interactive STEM curriculums for primary and secondary school students, aiming to bridge the digital divide in underserved communities.
- Mentored students in foundational programming and logic, translating complex technical concepts into accessible, age-appropriate lessons to inspire future careers in technology.

LANGUAGE SKILLS

Mother tongue(s): **SWAHILI**

Other language(s):

	UNDERSTANDING		SPEAKING		WRITING
	Listening	Reading	Spoken production	Spoken interaction
